

**ROSE HEIGHTS PRIMARY**

**GRADE 2 LIFE SKILLS**

**What are seasons?**

Seasons are types of weather we experience throughout the year. There are 4 different types of seasons experienced throughout the world, Winter, Spring, Autumn and Summer. Each season lasts for 3 consecutive months. During December, January and February, we have Summer. In March, April and May it is Autumn. June, July and August are Winter months. We have Spring on September, October and November.

**Activity – Name the season, write a sentence on it and colour in the picture**
