

There are also different levels of consumers in an ecosystem:

- Primary consumers are the herbivores which eat the plants, such as the mice and grass in this savanna food web.
- Secondary consumers eat primary consumers.
- Tertiary consumers eat the secondary or primary consumers.

ACTIVITY: Drawing food webs

INSTRUCTIONS:

1. Use the following lists of organisms in a sea and forest ecosystem to draw a food web for each ecosystem.

- Sea ecosystem: phytoplankton, sea-weed, zooplankton, crab, lobster-(scavenger), prawn, small fish, large fish, turtle, seal, dolphin, killer whale.
